

JEROME CHINEDU JOSEPHINE

Software Developer | Frontend Developer

[My Portfolio](#)

Gmail: nedunony16@gmail.com

Software developer with experience building responsive web applications using React, Next.js, TypeScript, and JavaScript. Passionate about creating intuitive user experiences and solving real-world problems through modern web technologies. Seeking a Software Engineering Internship where I can contribute, learn from experienced engineers, and continue growing as a developer.

TECHNICAL SKILLS

Languages

JavaScript (ES6+)

TypeScript

HTML5

CSS3

Frameworks & Libraries

React

Next.js

Tailwind CSS

Backend & Database

Firebase

REST APIs

Tools

Git

GitHub

VS Code

npm

Vercel

Currently Learning

Advanced TypeScript

AI Automation (Advanced Zapier)

Node.js

PROJECTS

Lumen Optometry Clinic

Stack: React.js, GSAP motion, Tailwind CSS, Whatsapp API

- Architected a 4-page, responsive optometry platform featuring fluid, scroll-triggered animations implemented with **GSAP** for an engaging user experience.
- Integrated the **WhatsApp API** alongside an interactive booking workflow to streamline patient inquiries and reduce booking friction.

- Designed a targeted online booking section alongside clear service pages, delivering a friction-free patient onboarding workflow from discovery to appointment scheduling

Live Demo: [Lumen Eye Clinic](#)

Party Card Builder

Stack: Next.js, Typescript, Tailwind CSS, Web API, Html-Image

- I developed a responsive micro-SaaS web app in Next.js, React, and TypeScript featuring real-time DOM state sync across customizable design controls.
- Integrated **html-to-image** rendering with Base64 SVG pattern overlays, generating crisp, high-resolution (3x pixel density) PNG/JPEG downloads with zero backend dependency.
- Implemented the Web Share API with automated fallback triggers to enable native mobile file sharing and seamless client-side image generation.

Live Demo: [Part Card Builder](#)

Fashion Portfolio Website

Stack: Next.js, TypeScript, Tailwind CSS

- Designed and developed a responsive modern fashion brand website.
- Implemented reusable React components.
- Optimized performance and mobile responsiveness.
- Showcases projects, skills, and contact information.

Live Demo: [Fashion Brand Website](#)

AI Automation Project

Tech: JavaScript, APIs, Zapier

- I built an automation workflow that generates content ideas, captions and gives hashtags based on your niche.
- I integrated external APIs.
- I created workflow efficiency through automation.

Live Demo: [AI automation zapier](#)

Automated Customer Service Email

Tech: JavaScript, Zapier AI agent, Forms, Gmail

- Integrated a third-party automated AI response to customer complaints or feedback.
- It gives response to the user immediately
- It reports back to the HR emails a report of all the customers complaints and feedbacks

Live Demo: [Automated email Zapier](#)

OPEN SOURCE

- Contributed to open-source repositories on Drips.
- Participated in issue discussions and code improvements.

- Regularly maintain personal projects and public repositories.
-

EDUCATION

Bingham University

Doctor of Optometry (O.D.)

Expected Graduation: 2031

CERTIFICATIONS

- AltSchool Africa | Software Engineering
-

ACHIEVEMENTS

- Built multiple production-ready web applications.
 - Active GitHub contributor.
 - Continuously expanding skills in React, Next.js, TypeScript, and AI automation.
-

ADDITIONAL INFORMATION

- Strong communication skills
- Team collaboration
- Problem-solving
- Continuous learner
